

Recommendation Letter

I am pleased to recommend Mr. Pranav Bhardwaj for admission in Master's program at your esteemed University. I have had the privilege of being Pranav's instructor for the Multiple-Device Programming course at NIIT University, where I witnessed his dedication and creativity. In this course, Pranav worked extensively on various web development technologies, including HTML, CSS, Bootstrap, JavaScript, Angular and My SQL.

One of the notable aspects of Pranav's performance during the R&D course was his project under my guidance, "Content Popularity Prediction for Caching in Information Centric Networking". The project aimed to create a popularity based in-network caching algorithm using Named Data Networking architecture. The proposed algorithm considers content popularity and content lifetime for caching.

Pranav is a punctual and obedient student. He also designed an employee management system using .NET framework that uses C sharp programming language with My SQL database. I have observed him shoulder responsibility for his team and advocate them in a group project. He is approachable and always willing to assist fellow classmates, bringing up a positive learning environment in the classroom.

Pranav will be a valuable addition to your university's academic community. I recommend him for admission in your University. I wish him the very best in all his future endeavours.

Sincerely,

Dr. Supratik Banerjee
Assistant Professor
Dept. of Computer Science & Engineering
NIIT University
